Gold Data Platform

As a select **Azure™ Circle** Partner
and a Microsoft **Gold** Partner,
Imaginet is recognized by Microsoft
as having the experience to provide
customers like you with an
unparalleled level of expertise.

2011 PARTNER OF THE YEAR
Application Lifecycle Management
Winner

Microsoft Azure Active Directory (AD) provides convenient identity and access management capabilities in the cloud. While Azure AD could be used as a standalone cloud directory, the greatest benefits come from integrating (i.e. federating) Azure AD with your existing on-premise Active Directory, creating a seamless single sign on (SSO) experience that extends into the cloud.

Benefits of a Federated On-Prem AD with Azure AD:

- Enhance end user productivity with a seamless single sign on (SSO) experience for both on-prem and for the cloud
- Securely and seamlessly manage your user and device identities, both cloud and on-premises, through a unified experience
- Manage first- and third-party applications, SaaS, and other existing cloud and on-premise applications through a unified experience
- Simplify your cloud-based administrative tasks
- Flexibility to add Azure AD identities without adding them to your on-premise AD, thus enhancing overall security

Get Started with a Federated Azure AD in Just 10 Days!

As an Azure Circle partner, Imaginet is recognized by Microsoft as having the expertise needed to help organizations successfully leverage Microsoft Azure AD today. With our 10-day Azure Cloud Identity & Federation Quick Start, Imaginet will provide you the jump start you need to begin taking advantage of a federated Azure Active Directory in just 2 weeks.

Day 1 & 2

Goal Assessment &
Cloud App Discovery

Day 3 & 4

Design & Review AD
Architecture

Day 5 & 6

Setup & Config of
Federated Azure AD

Day 7 & 8

Config & Testing of
Federated Azure AD

Day 9 & 10

Finalize &
Training

Roadmap &
Next Steps

*Bring the combined power of Imaginet's expertise and
the convenience of Azure Active Directory to your team!*
