

Global Microsoft ALM  
Partner of the Year

## Accelerate Your Software Delivery and Improve Application Quality with DevOps

DevOps brings together decades of the best, proven practices from development and operations—e.g., agile and Lean—and aligns them around their common characteristics: value, empiricism, and cross-functional collaboration among many others. DevOps bridges the gap between agile software development and operations, and once the traditional silos between dev and ops are dismantled, DevOps enables real-time collaboration, knowledge sharing, and a unified strategy across everyone who has a stake in delivery—and that’s everyone in your organization.

### Benefits of Leveraging DevOps in Your Organization:

**2x** likely to exceed goals in  
**Profits, Market Share, and Productivity**  
when DevOps is leveraged

Ship code **30x**  
**Faster** with DevOps

Have **50%**  
**Fewer Failures**  
when using a full DevOps solution

Restore Service  
**12x Faster**  
than your peers who do not utilize DevOps

## Sounds Great! How Do I Get Started?

Most organizations lack the experience to know how to successfully setup a successful end-to-end DevOps solution. As a Microsoft Gold ALM & Azure Circle partner, Imaginet is recognized by Microsoft as having the expertise you need to help your organization start reaping the benefits of DevOps today.

“From the five engagements that we have done with Imaginet so far, we’ve been really, really happy with each one of them. Imaginet is a really good company to work with, and their reputation speaks for itself.”

*Michel Thivierge, Director of Application Architecture, DataScan Holdings*

## Get Started Today with Imaginet’s 10-Day Azure DevOps Quick Start!

With Imaginet’s Azure DevOps Quick Start, Imaginet will create and configure your customized DevOps solution and guide you through how to achieve continuous integration, continuous testing, and continuous delivery with a selected application in just 10 days. At the end of our Quick Start, we will provide your team with the essential DevOps mentoring you will need, as well as clear roadmap for your next steps.

### Day 1&2

Kickoff, Planning,  
& Assessment;  
SME Interviews

### Day 3&4

Design DevOps  
solution; Envir  
setup and config

### Day 5&6

Continuous  
Integration &  
Deployments

### Day 7&8

Release Pipeline;  
Monitoring w/App  
Insights

### Day 9&10

DevOps Mentoring  
Finalize & Review

### Roadmap & Next Steps

## The Imaginet Advantage

- **Experience.** Imaginet’s ALM team has designed, deployed, and mentored organizations on DevOps best practices and has real world experience.
- **Working DevOps Environment.** Your customized DevOps environment will be setup and configured with industry leading best practices and Microsoft Certified Consultants.
- **Integrated Best Practices.** Our consultant will ensure that best practices are tailored for your environment and integrate with organizational processes throughout the project.
- **Just In Time Education.** Learn the skills you need for your DevOps environment with no lag between the learning and the implementation of knowledge.
- **Flexible Engagement Models.** Imaginet is there to do the work, assist and guide, but your team is ensured that they get the hands-on experience required to be successful.

Bring the combined power of Imaginet’s expertise and the benefits of DevOps to your team today! **Get started today by emailing [info@imaginet.com](mailto:info@imaginet.com) or calling 1-800-989-6022.**

17 years, 1,100 customers and 2,400 engagements later...  
we’re as innovative as ever
